Freedom of the Will

Jonathan Edwards

Part II.

WHEREIN IT IS CONSIDERED WHETHER THERE IS OR CAN BE ANY SORT OF FREEDOM OF WILL,
AS THAT WHEREIN ARMINIANS PLACE THE ESSENCE OF THE LIBERTY OF ALL MORAL AGENTS;
AND WHETHER ANY SUCH THING EVER WAS OR CAN BE CONCEIVED OF.

Section 3.

Whether any event whatsoever, and Volition in particular, can come to pass without a Cause of its existence.

BEFORE I enter on any argument on this subject, I would explain how I would be understood, when I use the word Cause in this discourse; since, for want of a better word, I shall have occasion to use it in a sense which is more extensive than that in which it is sometimes used. The word is often used in so restrained a sense as to signify only that which has a positive efficiency or influence to produce a thing, or bring it to pass. But there are many things which have no such positive productive influence; which yet are Causes in this respect, that they have truly the nature of a reason why some things are, rather than others; or why they are thus, rather than otherwise. Thus the absence of the sun in the night, is not the Cause of the fall of dew at that time, in the same manner as its beams are the cause of the ascent of vapors in the day-time; and its withdrawment in the winter, is not in the same manner the Cause of the freezing of the waters, as its approach in the spring is the cause of their thawing. But yet the withdrawment or absence of the sun is an antecedent, with which these effects in the night and winter are connected, and on which they depend; and is one thing that belongs to the ground and reason why they come to pass at that time, rather than at other times; though the absence of the sun is nothing positive, nor has any positive influence.

It may be further observed, that when I speak of connexion of Causes and effects, I have respect to moral Causes, as well as those that are called natural in distinction from them. Moral Causes may be Causes in as proper a sense as any Causes whatsoever; may have as real an influence, and may as truly be the ground and reason of an Event's coming to pass.

Therefore I sometimes use the word Cause, in this inquiry, to signify any antecedent, either natural or moral, positive or negative, on which an Event, either a thing, or the
manner and circumstance of a thing, so depends, that it is the ground and reason, either in whole, or in part, why it is, rather than not; or why it is as it is, rather than otherwise; or, in other words, any antecedent with which a consequent event is so connected, that it truly belongs to the reason why the proposition which affirms that Event is true; whether it has any positive influence, or not. And agreeably to this, I sometimes use the word effect for the consequence of another thing, which is perhaps rather an occasion than a Cause, most properly speaking.

I am the more careful thus to explain my meaning, that I may cut off occasion, from any that might seek occasion to cavil and object against some things which I may say concerning the dependence of all things which come to pass, on some Cause, and their connexion with their Cause.

Having thus explained what I mean by Cause, I assert, that nothing ever comes to pass without a Cause. What is self-existent must be from eternity, and must be unchangeable: but as to all things that begin to be, they are not self-existent, and therefore must have some foundation of their existence without themselves.—That whatsoever begins to be, which before was not, must have a Cause why it then begins to exist, seems to be the first dictate of the common and natural sense which God hath implanted in the minds of all mankind, and the main foundation of all our reasonings about the existence of things, past, present, or to come.

And this dictate of common sense equally respects substances and modes, or things and the manner and circumstances of things. Thus, if we see a body which has hitherto been at rest, start out of a state of rest, and begin to move, we do as naturally and necessarily suppose there is some Cause or reason of this new mode of existence, as of the existence of a body itself which had hitherto not existed. And so if a body, which had hitherto moved in a certain direction, should suddenly change the direction of its motion; or if it should put off its old figure, and take a new one; or change its color: the beginning of these new modes is a new Event, and the human mind necessarily supposes that there is some Cause or reason of them.

If this grand principle of common sense be taken away, all arguing from effects to causes ceaseth, and so all knowledge of any existence, besides what we have by the most direct and immediate intuition, particularly all our proof of the being of God, ceases: we argue His being from our own being, and the being of other things, which we are sensible once were not, but have begun to be; and from the being of the world, with all its constituent parts, and the manner of their existence; all which we see plainly are not necessary in their own nature, and so not self-existent, and therefore must have a Cause. But if things, not in themselves necessary, may begin to be without a Cause, all this arguing is vain.

Indeed, I will not affirm, that there is in the nature of things no foundation for the knowledge of the Being of God, without any evidence of it from his works. I do suppose there is a great absurdity in denying Being in general, and imagining an eternal, absolute, universal nothing: and therefore that there would be, in the nature of things, a
foundation of intuitive evidence, that there must be an eternal, infinite, most perfect
Being; if we had strength and comprehension of mind sufficient, to have a clear idea of
general and universal Being. But then we should not properly come to the knowledge of
the Being of God by arguing; our evidence would be intuitive: we should see it, as we
see other things that are necessary in themselves, the contraries of which are in their
own nature absurd and contradictory; as we see that twice two is four; and as we see
that a circle has no angles. If we had as clear an idea of universal, infinite entity, as we
have of these other things, I suppose we should most intuitively see the absurdity of
supposing such Being not to be; should immediately see there is no room for the
question, whether it is possible that Being, in the most general, abstracted notion of it
should not be. But we have not that strength and extent of mind, to know this certainly in
this intuitive, independent manner: but the way that mankind come to the knowledge of
the Being of God, is that which the apostle speaks of, Rom. 1:20. The invisible things of
him from the creation of the world, are clearly seen; being understood by the things that
are made; even his eternal power and Godhead. We first ascend, and prove a
posteriori, or from effects, that there must be an eternal Cause; and then secondly,
prove by argumentation, not intuition, that this Being must be necessarily existent; and
then thirds, from the proved necessity of his existence, we may descend, and prove
many of his perfections a priori.

But if once this grand principle of common sense be given up, that what is not
necessary in itself, must have a Cause; and we begin to maintain, that things which
heretofore have not been, may come into existence, and begin to be of themselves,
without any cause; all our means of ascending in our arguing from the creature to the
Creator, and all our evidence of the Being of God, is cut off at one blow. In this case, we
cannot prove that there is a God, either from the Being of the world, and the creatures in
it, or from the manner of their Being, their order, beauty, and use. For if things may
come into existence without any Cause at all, then they doubtless may without any
Cause answerable to the effect. Our minds do alike naturally suppose and determine
both these things; namely, that what begins to be has a Cause, and also that it has a
Cause proportionable to the effect. The same principle which leads us to determine, that
there cannot be any thing coming to pass without a Cause, leads us to determine that
there cannot be more in the effect than in the Cause.

Yea, if once it should be allowed, that things may come to pass without a Cause, we
should not only have no proof of the Being of God, but we should be without evidence of
the existence of any thing whatsoever, but our own immediately present ideas and
consciousness. For we have no way to prove any thing else, but by arguing from effects
to Causes: from the ideas now immediately in view, we argue other things not
immediately in view; from sensations now excited in us, we infer the existence of things
without us, as the Causes of these sensations; and from the existence of these things,
we argue other things, on which they depend, as effects on Causes. We infer the past
existence of ourselves, or any thing else, by memory; only as we argue, that the ideas,
which are now in our minds, are the consequences of past ideas and sensations. We
immediately perceive nothing else but the ideas which are this moment extant in our
minds. We perceive or know other things only by means of these, as necessarily
connected with others, and dependent on them. But if things may be without Causes, all this necessary connexion and dependence is dissolved, and so all means of our knowledge is gone. If there be no absurdity or difficulty in supposing one thing to start out of non-existence into being, of itself without a Cause; then there is no absurdity or difficulty in supposing the same of millions of millions. For nothing, or no difficulty, multiplied, still is nothing, or no difficulty: nothing multiplied by nothing, does not increase the sum.

And indeed, according to the hypothesis I am opposing, of the acts of the Will coming to pass without a Cause, it is the cause in fact, that millions of millions of Events are continually coming into existence contingently, without any Cause or reason why they do so, all over the world, every day and hour, through all ages. So it is in a constant succession, in every moral agent. This contingency, this efficient nothing, this effectual No-Cause, is always ready at hand, to produce this sort of effects, as long as the agent exists, and as often as he has occasion.

If it were so, that things only of one kind, viz. acts of the Will, seemed to come to pass of themselves; and it were an Event that was continual, and that happened in a course, wherever were found subjects capable of such Events; this very thing would demonstrate that there was some Cause of them, which made such a difference between this Event and others, and that they did not really happen contingently. For contingency is blind, and does not pick and choose a particular sort of Events. Nothing has no choice. This No-Cause, which causes no existence, cannot cause the existence which comes to pass, to be of one particular sort only, distinguished from all others. Thus, that only one sort of matter drops out of the heavens, even water, and that this comes so often, so constantly and plentifully, all over the world, in all ages, shows that there is some Cause or reason of the falling of water out of the heavens; and that something besides mere contingency has a hand in the matter.

If we should suppose Non-entity to be about to bring forth; and things were coming into existence, without any Cause or antecedent, on which the existence, or kind, or manner of existence depends; or which could at all determine whether the things should be stones, or stars, or beasts, or angels, or human bodies, or souls, or only some new motion or figure in natural bodies, or some new sensations in animals, or new ideas in the human understanding, or new volitions in the Will; or any thing else of all the infinite number of possibles; then certainly it would not be expected, although many millions of millions of things were coming into existence in this manner, all over the face of the earth, that they should all be only of one particular kind, and that it should be thus in all ages, and that this sort of existences should never fail to come to pass where there is room for them, or a subject capable of them, and that constantly, whenever there is occasion.

If any should imagine, there is something in the sort of Event that renders it possible for it to come into existence without a Cause, and should say, that the free acts of the Will are existences of an exceeding different nature from other things; by reason of which they may come into existence without any previous ground or reason of it, though other
things cannot; if they make this objection in good earnest, it would be an evidence of
their strangely forgetting themselves; for they would be giving an account of some
ground of the existence of a thing, when at the same time they would maintain there is
no ground of its existence. Therefore I would observe, that the particular nature of
existence, be it never so diverse from others, can lay no foundation for that thing
coming into existence without a Cause; because to suppose this, would be to suppose
the particular nature of existence to be a thing prior to the existence, and so a thing
which makes way for existence, without a cause or reason of existence. But that which
in any respect makes way for a thing coming into being, or for any manner or
circumstance of its first existence, must, be prior to the existence. The distinguished
nature of the effect, which is something belonging to the effect, cannot have influence
backward, to act before it is. The peculiar nature of that thing called Volition, can do
nothing, can have no influence, while it is not. And afterwards it is too late for its
influence: for then the thing has made sure of existence already, without its help.

So that it is indeed as repugnant to reason, to suppose that an act of the Will should
come into existence without a Cause, as to suppose the human soul, or an angel, or the
globe of the earth, or the whole universe, should come into existence without a Cause.
And if once we allow, that such a sort of effect as a Volition may come to pass without a
Cause, how do we know but that many other sorts of effects may do so too? It is not the
particular kind of effect that makes the absurdity of supposing it has being without a
Cause, but something which is common to all things that ever begin to be, viz. That they
are not self-existent, or necessary in the nature of things.
